My Journey

Before 2011 😂

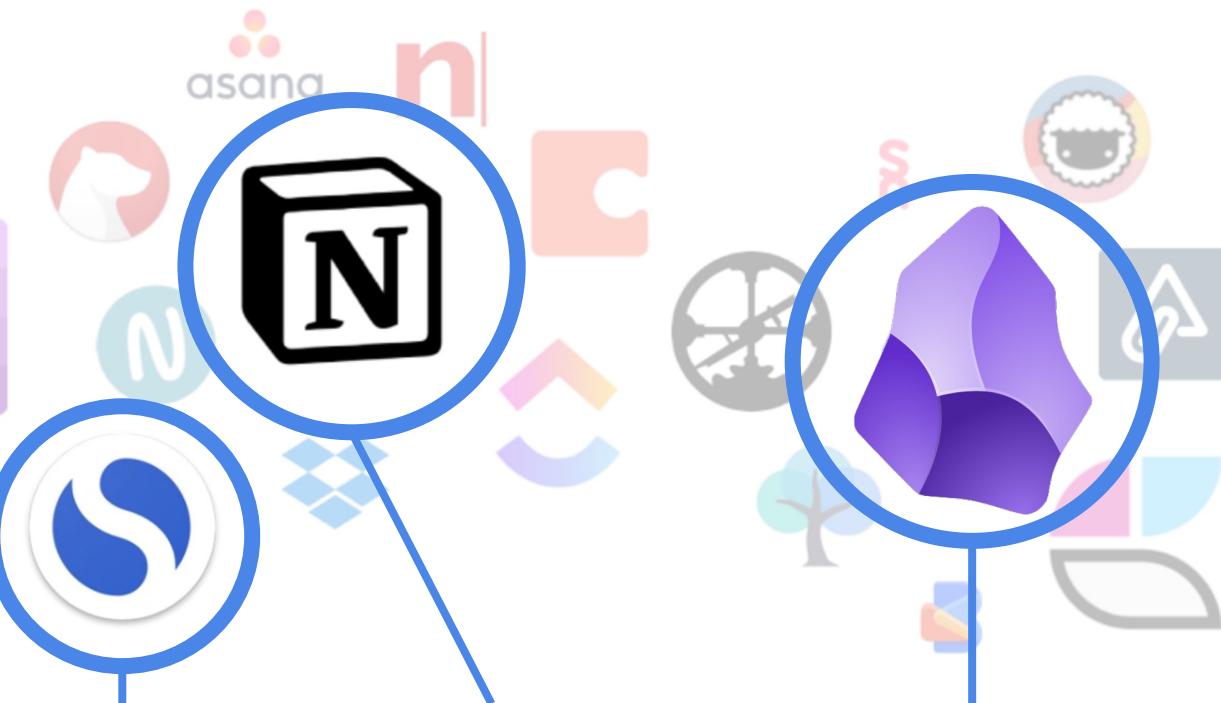

2011 - 2013

2014 - 2021

2021 - 2024

2024 - Now

But.. Why Obsidian ?

Why I chose Obsidian.md ?

1. Your Notes **ARE YOUR NOTES**

- Obsidian save your notes LOCALLY, as MARKDOWN files.
- You can do bunch of things over that e.g. Feed AI, Integrate with Git for version control.

2. **Links & Backlinks / Making Connection**

- Link through your notes, or anything. Just like Wikipedia...
- But this time as your **Personal Knowledge**.

3. **Community Plugins (More than 2,000+)**

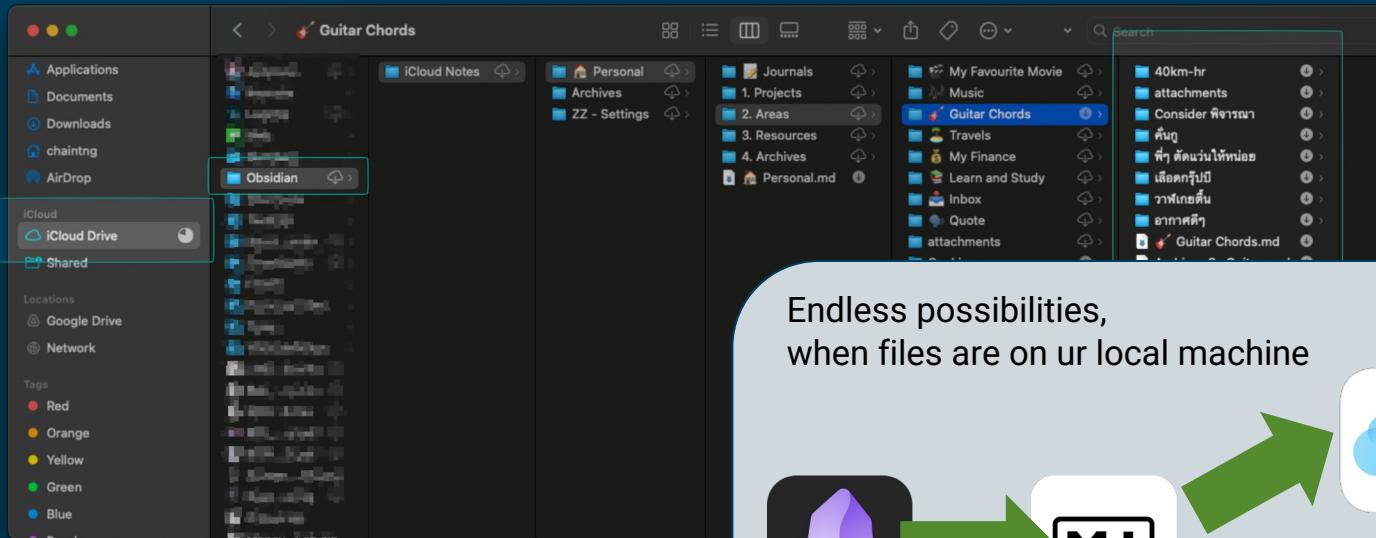

- *2,000+ plugins* to solve certain problem which might solve ours also.

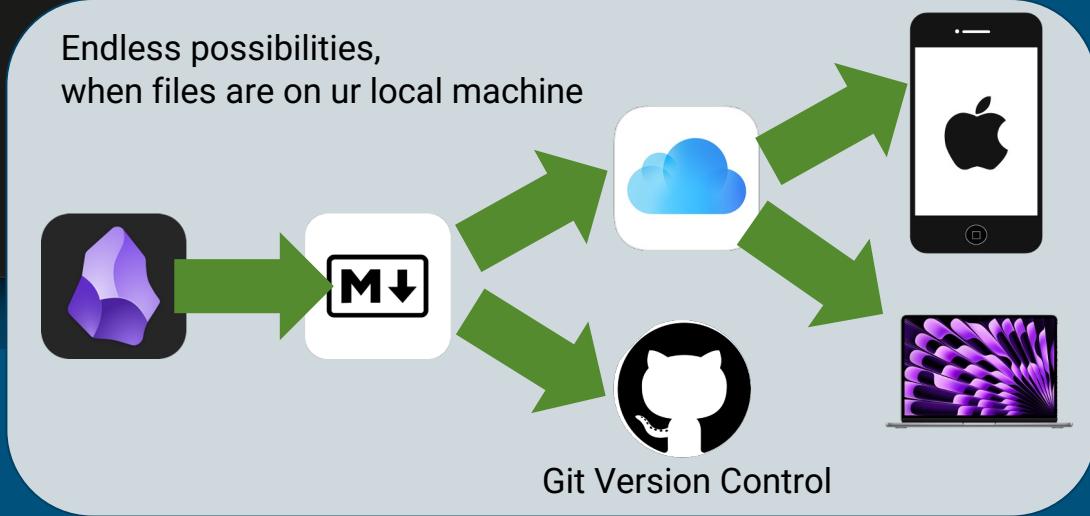

Why not ... (Again, FOR ME, FOR Mr.POR)

Tools	Major Problem	Others Issue
 Pen & Papers	Ability to recall or search	Slower than typing, it's fragile (lost, rotten)
Apple Notes	Unable to Export (or i can't find)	
Notions	Required Internet	
Simplenotes	Cannot attach image	No Formatting
Google Drives	Linking through notes	Reused Attached Image, it's paper-style
Obsidian.md	Native Apps is just “okay” Lots of improvement need.	SO ADDICTIVE  - like playing minecraft Big time investment, High learning curve

1. Your notes ARE YOUR NOTES – WDYM ? 🤔

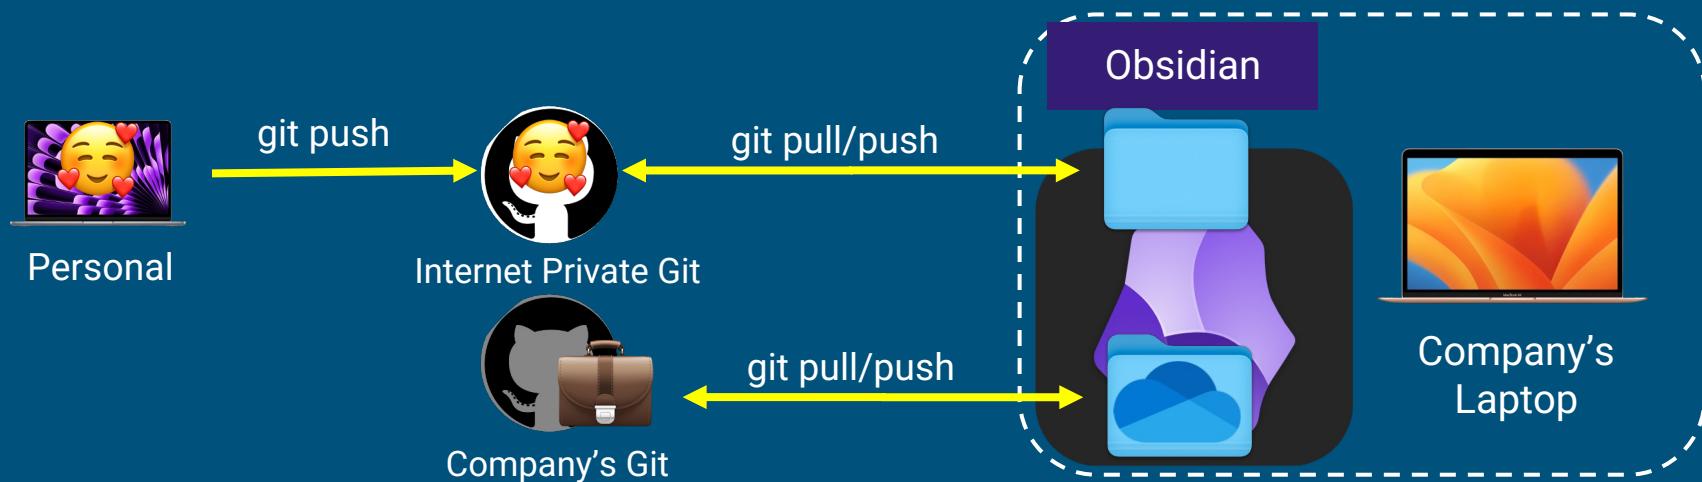

Endless possibilities,
when files are on ur local machine

Use Case: Separate Work & Personal Notes

Problems: Work Notes may contain company's related data.

✖ It should **NOT** leave company laptop, or sit on other's server.

Question: How would u do this with **Notion** or others app ?

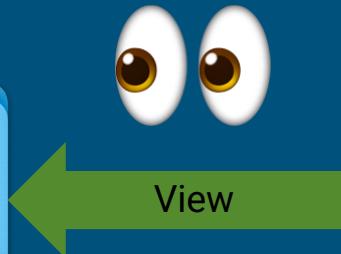

2nd Use Case: KSS How to use Obsidian.md

My Obsidian
My 2nd Brain 🧠

My Demo Obsidian
BUT Only Prefrontal Cortex
section 😂

Public Audience

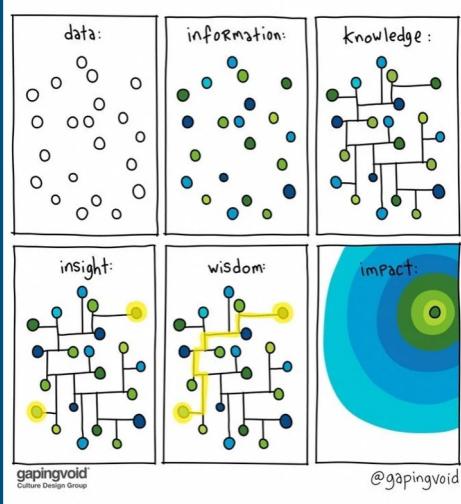

How can we do **Notion Knowledge Sharing** ?
Re-create new account ?

Again, i know, this is SPECIAL USE CASE

2. Links & Backlinks

- Improve Learning
- Create Wisdom
- Increase Discoverability

Links

Create connections between your notes. Link anything and everything — ideas, people, places, books, and beyond. Invent your own personal Wikipedia.

In [Meditations on First Philosophy](#) the philosopher [René Descartes](#) describes a series of doubts about the nature of reality, arriving at the famous phrase:

- [[I thin]]
- He I think therefore I am
- ac Just think about it

[Thinking, Fast and Slow](#)

[The Thing](#)
Movies/

Graph

Visualize the relationships between your notes. Find hidden patterns in your thinking through a visually engaging and interactive graph.

& Git

Source: Lj Miranda, "What can Avengers: Endgame teach us about Git?", 2021,
<https://ljvmiranda921.github.io/notebook/2021/06/05/avengers-git/>

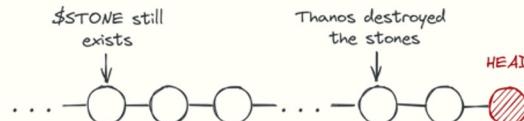

Checkout a point in the past

With the stones reduced to atoms, our heroes decided to conduct a time heist. First, they need to identify when in their shared history the stones are within reach.

In Git, you can view an object's full history by typing:

```
# Get full history of a specific file  
git log --all --full-history <path/to/file>
```

This also allowed them to pinpoint the exact location of the stones. After determining those crucial points, they used the remaining Pym particles to traverse the quantum realm.

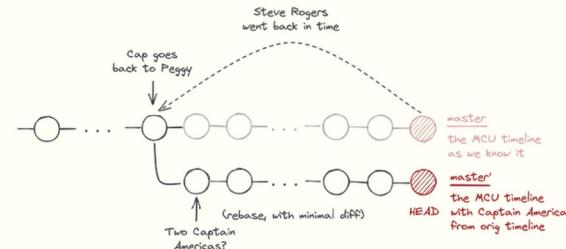

Rewriting history (?) with rebase

In the epilogue of Endgame, we see Captain America returning the stones in their original timelines. However, instead of going back to `HEAD`, he stayed in a particular commit to pursue a committed relationship with Peggy Carter.

```
git checkout <SHA>
```

All is well, but we see him again back in `HEAD` as an older version of himself. Initially, I thought that he decided to live in an alternate reality, but did he *perhaps* rewritten history by rebasing?

```
git checkout <SHA>  
echo "Decided to stay with Peggy" >> steve Rogers life plan.txt  
git add steve Rogers life plan.txt  
git commit -m "Try some of that life Tony was telling me to get"
```

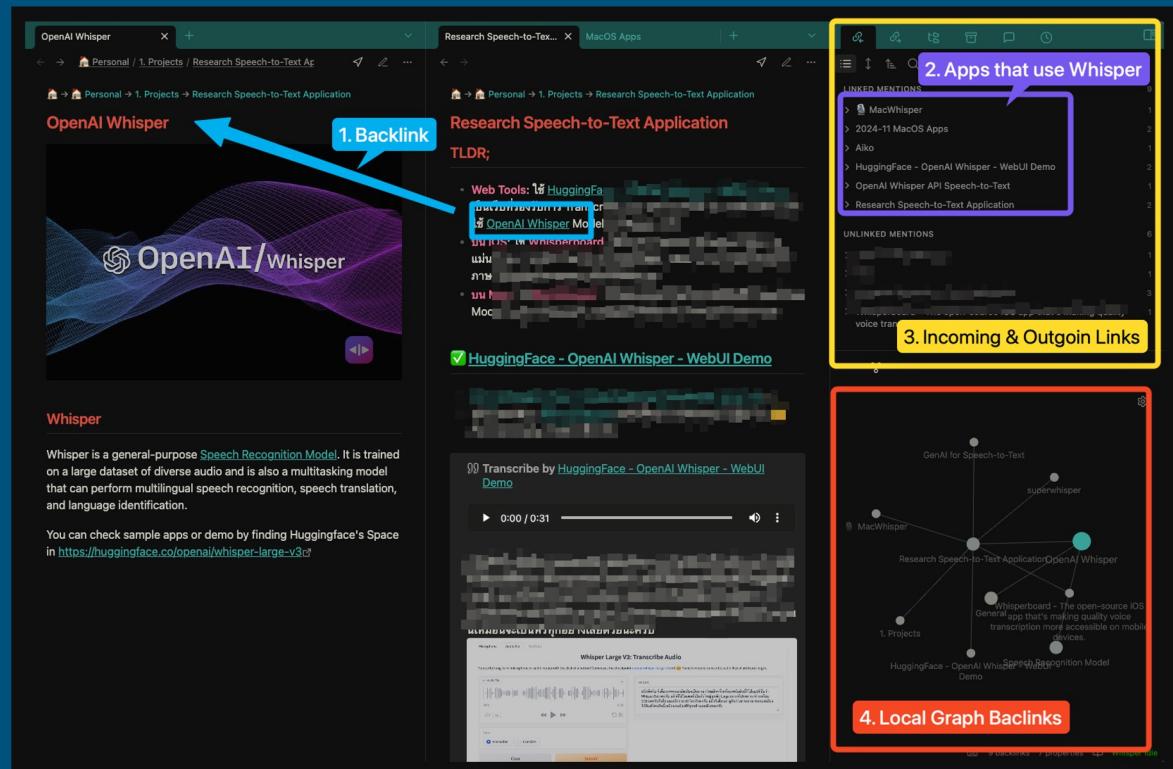

2. Links & Backlinks

Scenario:

You're researching on
Speech-to-Text Tools

- You learn OpenAI Whisper
- You make Connection between Tools

3. Community Plugins – *FUN part* for Engineer

- Obsidian built on top of **Electron** – as in Slack and VSCode
- So, just like VSCode, the communities are building *2,000+ plugins* to solve certain problem which might solve ours also. e.g.
 - **dataview** – to query ur notes, database-like.
 - **Omnisearch** – Fuzzy search through your notes
 - Copilot – GenAI to ask ANY thing from ur notes
- Mr.Por published 2 plugins in the marketplace already 😂

GenAI

Based on my notes, it's my diary, do u think which day or event is the most happiness moment ?

context: Journal/2022/2022-05/Beach Picture 2022-05-01.md, Journal/2022/2022-05/My Photo , Tubtim Be...

Based on your notes, the most happiness moment appears to be on December 15, 2023, during the Wonderfruit Festival. You described the event as filled with a vibrant atmosphere, creative stages, and a positive vibe where everyone was friendly and sharing good energy. You expressed gratitude for the people around you who enhanced your enjoyment of the event, despite some challenges you faced. The excitement and connection you felt during this festival suggest it was a particularly joyful experience for you.

Introducing... VOICE JOURNALING 🎙️

The screenshot shows a digital journaling application interface. At the top, there's a header bar with a date (2024-11-30), a 'Select Text as Post Process ...' button, and a '+' button. Below the header, the URL bar shows 'Personal / Journals / 2024-11-30'. The main content area displays a journal entry for 'Dua Lipa Radical Optimism Concert Tour' on '2024-11-30'. A red callout box highlights the 'Voice Journal' tab. To the right of the journal entry, there's a sidebar with a list of common phrases and their meanings, such as 'Good night' (กูด เนิฟ) and 'Native' (เนทีฟ). At the bottom of the sidebar, it says 'Input: Transcribe + GenAI Prompt'. A large blue arrow points from the bottom left towards the 'Input' text.
